Centrafest provides a comprehensive set of DMS solutions, mini ERPs, Smart office concept solutions, e-Learning, e-Business consulting and IT services including strategic consulting, creative design, multimedia & animation, technology integration and implementation, as well as management and maintenance of Internet applications.

We provide Solutions for dynamic environment where business and technology strategies converge. We work with large global corporations and new generation technology companies - to build new products or services and to implement prudent business and technology strategies in today's dynamic digital environment. Centrafest is a company that creates, designs and develops technology to deliver measurable results with direct impact on your

bottom line. After an analysis of your unique needs and operations, we employ the right tools to drive your Return On Investment (ROI) higher to increase your selling power! Our solutions help you organize business and technology strategies - cost effectively.

➤ The only Patented Business Card Reader

Centrafest has introduced the only patented business card scanner and management system that automatically reads and organizes your business cards with a long list of clients worldwide. Centrafest has spent many years along with channel partners, building scanners designed to do one thing-turn business cards into electronic information.

Our patented Business Card Reader is a business card scanner and management system that automatically reads and organizes your business cards. You can scan all of your business cards into one searchable database with no retyping, and then transfer this information to your PC, contact manager or Palm PDA for easy access.

How is it possible? This powerful hardware/software kit includes a pocket-sized USB scanner that allows you to instantly grab the information you need whenever anyone hands you a business card. It's highly specialized software reads the card and sorts through all of the information: recognizing the person's name, his or her company name, mailing and email addresses, phone numbers, etc. All of this data is then sorted and allocated to each entry's respective field within a searchable base.

Names will go into the "Name" field, addresses into their respective field, and so on. This incredibly robust software can even read stylized fonts and differentiate text from color-filled backgrounds!. More than 15,000 corporate giants on its client list worldwide.

- ✂ Scan and recognize Business cards ✂ Find any contact within seconds ✂ Sort, Categorize, Print, E-mail contacts
- ✂ Retrieve business cards by any field ✂ Add & modify contact easily ✂ Import/export business cards database

➤ The Only Patented Complete Mobile Document Management Solutions

Digital-imaging technology took a significant leap forward with the introduction of the range of **only patented models** of mobile portable scanners viz 464,464 pro,2300,660,800 etc.

The smallest and most convenient mobile scanners are currently available with us. These A4, sheet-fed,high speed color scanning devices are super-compact portable scanners that requires no external power. A compact design, high-performance and unsurpassed quality are the key features of the complete mobile scanners range.

With powerful bundled DMS software and Business Card Reading Software make Mobile Scanners always ready to scan and organize all of your documents, photos, articles, brochures and business cards.

Award-winning Document Management /photo/image management software supports over 100 popular applications, including color OCR and full-text indexing functions.

Smart Touch feature facilitates our product range One Click Utility Software.

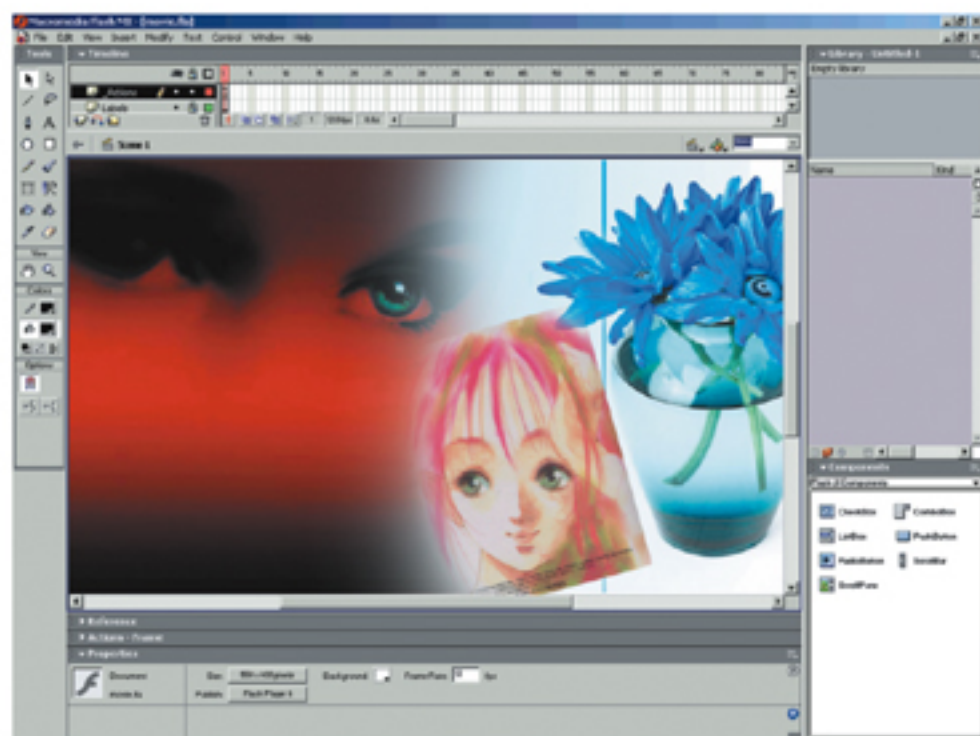

More than 18,000 clients on its client list worldwide.

- ✂ Portable colour scanner ✂ USB interface ✂ 3 pages per minute ✂ OCR, PDF converter
- ✂ Power cord free device ✂ Bundled with new generation Document Management System ✂ Scan & Organize your documents, photos, news articles, brochures business cards
